

Promax Case Studies

Industrial Tanks with Seismic Restraint Systems for Countdown Bayfair

Who: Aquaholics Tauranga for Countdown Bayfair

Products: 1 x Promax Industrial 3000L & 1 x Promax Xpress 50000L

Where: The \$100 million upgrade to Bayfair centre, in Tauranga which included a new seven screen cinema complex, Countdown shopping centre, an alfresco dining precinct and 50 new shops with an additional 9000sqm augmenting the existing site.

Why: Sustainability. The tanks will enable onsite rain harvesting from the Countdown supermarket roof. The rainwater is then plumbed back in to supply the bathroom. These tanks were requested by the client design brief to be seismically restrained.

What: Promax designed and manufactured the seismic restraints. These restraints are suitable for high intensity situations where the tank must be serviceable post-earthquake. These meet Tauranga's seismic criteria and the appropriate vital Level Rating (IL2).

Products used in this design solution

- Promax Industrial 30000L Tanks
- PROMAX Seismic Restraints
- Promax Industrial 3000L Tanks
- PS1s
