This simple kit attaches to your tank outlet, floating on the surface of the water within your tank. This means you draw only the cleanest water from your tank, just below the surface.

**APPLICATION**

Great for any tank that will be used for household or potable water supply.

**FEATURES**

- Simple DIY Kit
- Ensures using the cleanest water first
- 2 Meters of 25mm flexible suction hose
- Adjustable float level below the surface
- Keep pipework above ground
- Food grade materials
- No maintenance required

Did you know the cleanest water in a tank is about 100mm below the surface whatever level the water in the tanks is?
