

PROMAX INSULATED TANKS

**EFFICIENT
DURABLE &
RELIABLE**

Difference between insulated tank vs non-insulated

Temperature differences between PE and Foam tanks

An insulated tank keeps the water 15% cooler over 16 hours vs non insulated - Meaning you make Power Savings!

INSULATED TANKS

Promax Plastics manufacture the largest range and sizes of insulated tanks in New Zealand, providing the dairy and food industries with new temperature controlled liquid storage solutions and energy savings.

- Large range - 450 to 30,000L capacities
- Save money on energy costs
- No maintenance one-piece foam insulation providing consistent temperature control
- Strong one piece corrugated side wall construction
- Save time with factory fitted modifications
- Free nationwide delivery to your property

CODE	CAPACITY (L)	HEIGHT (mm)	DIAMETER (mm)
