LIQUID MANAGEMENT SOLUTIONS

Promax Septic Tanks

These ‘Single Stage’ Filtered Promax Septic Tanks are manufactured from polyethylene to meet the AS/NZS:1546 Standard for Septic Tanks.

Designed by geotechnical experts this heavy duty ribbed tank has been designed and fully tested to withstand ground and water pressure at depth and is completely internally plumbed up to the outlets.

Features

- Easy to handle, Promax Septic Tanks are a one piece moulded tank.
- Fully pre-assembled, Promax Septic Tanks are pre-assembled before leaving the factory, to minimise the amount of work required on site. Simply position the tank and connect in and out flow pipes!
- Low, compact design, Promax Septic Tanks are designed to minimise the amount of digging required prior to installation.
- New Zealand made, Promax Septic Tanks are fully designed and manufactured in New Zealand using only high quality materials.
- Better performance, the ribbed design of the Promax Septic Tank provides incredible strength and resistance to shape deformation.
